Art Unit: 1733

1) A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 2-1-05 has been entered.

Examiner's Amendment

2) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 1:

last three lines change "and between the knurled parts, non-knurled parts each having a positive length in the longitudinal direction of the wide circumferential groove are present" to --wherein the knurled parts are provided only on said groove bottom--.

Change title to --Pneumatic tire including groove bottom rib--.

3) Authorization for this examiner's amendment was given in a telephone interview with Mark Nuell on 2-17-05.

Reasons for Allowance

4) The following is an examiner's statement of reasons for allowance, which supplement applicant's arguments filed 2-1-05:

Although Consolation et al shows knurled parts (see serrations 26 in figure 2), these serrations *extend across the entire width* of the bottom of the aquachannel defined by lugs of various lengths and there is no suggestion to select these serrated portions and provide them on *each side* of the "groove bottom rib"(combination of rib 10 and shallow groove and rib 10) in the figure 4 embodiment of Ikeda.

Although Nakagawa et al teaches knurled parts (lateral ribs 4c) on each side of circumferentially extending ribs 4a,4a, there is no suggestion to combine Ikeda and Nakagawa such that the knurled parts are provided *only at the groove bottom* since if the lateral ribs 4c suggested by Nakagawa et al are removed from the sidewalls of the groove, air will not be discharged as taught by Nakagawa et al (see figure 2, figure 9, col. 4 lines 24-31).

The prior art including Ikeda, Consolation et al and Nakagawa, fails to suggest providing the groove bottom of Ikeda's figure 4 groove with knurled parts such that (1) each side of Ikeda's "groove bottom rib" (combination of rib 10 and shallow groove and rib 10 of figure 4) is provided with knurled parts intermittently disposed in the longitudinal direction of the groove, (2) the knurled parts are each made up of small ribs extending crosswise to the longitudinal direction of the groove and (3) the knurled parts are provided only on said groove bottom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven D. Maki whose telephone number is (571) 272-1221. The examiner can normally be reached on Mon. - Fri. 7:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine Copenheaver can be reached on (571) 272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
